

Orphan Australia Pty Ltd receives registration approval for the new dose form DepoDur™ modified release injection of morphine sulfate.

Melbourne, Australia, October 17th 2007 – Orphan Australia Pty Ltd, an Australian owned pharmaceutical company dedicated to providing novel, highly specialised pharmaceuticals, has been granted registration approval by the Therapeutic Goods Administration for DepoDur™. DepoDur™, which was developed by and licensed from Pacira Pharmaceutical, Inc. and utilizes Pacira's DepoFoam technology, is a novel, single dose modified-release formulation of morphine.

The approved indication in Australia is “for the relief of post-operative pain, following major orthopaedic, abdominal or pelvic surgery via the lumbar epidural route, at a maximum recommended dose of 10mg. Appropriate monitoring must be maintained for 48 hours.”

A single injection of DepoDur™ into the lumbar epidural space may provide pain relief for up to 48 hours, following major orthopaedic, abdominal or pelvic surgery without the restrictions and potential complications associated with an indwelling epidural catheter.

“We are pleased to add an innovative product like DepoDur™ to our growing hospital product portfolio” said John Michailidis, the Chief Executive Officer of Orphan Australia. “It fits well with our philosophy of providing specialists with novel, highly specialised products which otherwise would not be available to the Australian market. We believe DepoDur™ will play an important role in managing post-operative pain in selected types of surgery”.

DepoDur™ will be available in Australia from February 2008.

About Orphan Australia Pty Ltd.

Orphan Australia is a dynamic, rapidly growing, Australian owned company dedicated to providing novel, highly specialized products to treat serious or life-threatening conditions where treatment choice is limited or inadequate. DepoDur™ will be the first drug marketed by Orphan into the anaesthetic area, and adds to Orphan's strong presence in pain and palliative care, neurosurgery, gastroenterology, oncology, haematology, and nephrology. For additional information about Orphan Australia please visit the Company's website at <http://www.orphan.com.au>

About Pacira Pharmaceuticals Inc.

Pacira Pharmaceuticals Inc. is a wholly owned subsidiary of Pacira Inc, a Delaware corporation, which is controlled and funded by a group of financial investors including Sanderling Ventures, HBM Bioventures (Cayman) LTD, OrbiMed Advisors, and MPM Capital. This business is based in San Diego, CA, and focuses on formulating, developing and manufacturing controlled-release injectable products based on two proprietary drug delivery platform: DepoFoam® and Biosphere®.
